SUMMARY

Engineering student skilled in IOT, HTML, CSS, and Java, with experience in academic and personal projects. Building a strong foundation in data structures, algorithms, and backend architecture to develop scalable full-stack applications.

EDUCATION

- ❖ Bachelor of Computer Applications (BCA) from Swami Rama Himalayan University. (2024- Ongoing)
- ❖ XII (ISC) | Jyoti Vidyalaya Joshimath. (2024)

PROJECTS

- ❖ Engineered an autonomous prototype car using an Arduino Uno and ultrasonic sensors to measure distance and detect obstacles in real-time. (May 2026)
- ❖ Prototype parking system using touch sensors, Arduino Uno, and servo motors. (Nov 2025)
- ❖ ResQMate – AI-powered web app for disaster response with SOS alerts, nearby authority contacts, and incident reporting. (Sept 2025)

SKILLS

- ❖ **Languages:** Java, C
- ❖ **Concepts:** OOP, DBMS
- ❖ **AI:** Ai basics, CNN
- ❖ **Tools:** Figma, Blender basics, Canva

EXTRA-CURRICULAR

- ❖ Participated in Cyberthon and TechForge 2.0 and attended workshops on IoT, AI/ML, and Cybersecurity.
- ❖ 1st Place – CineVista Storytelling & Script Writing Competition, Indian Institute of Technology Roorkee.

CERTIFICATIONS

- ❖ Online Web Development course. ()
- ❖ AI Workshop at Indian Institute of Technology Roorkee (organized by HiLabs): Learned and applied data cleaning techniques such as handling missing values and removing duplicates. (Mar 2026)
